December

Central Florida Edition

What to Plant

Bedding Plants: To add color to the winter garden, plant masses of petunia, pansy, and snapdragon. **See:** [Gardening with Annuals in Florida](#)

Bulbs: Amaryllis is a popular plant for the holiday season. Force it to bloom now or plant outdoors for spring blooms. **See:** [Amaryllis](#)

Herbs: Plant herbs that thrive in cool weather. Some to try are parsley, thyme, sage, dill, fennel, and cilantro. **See:** [Herbs in the Florida Garden](#)

Vegetables: Reliable cool season vegetables to plant this month include celery, cauliflower, lettuce, cabbage, and carrot. **See:** [Florida Vegetable Gardening Guide](#)

What to Do

Poinsettias: One of the most popular holiday plants is poinsettia. Enjoy it indoors now, protect it from cold until spring, and then plant in the garden for re-blooming next year. **See:** [Poinsettias at a Glance](#)

Cold protection: Prepare now to protect tender plants should cold weather threaten. **See:** [Cold Protection of Ornamental Plants](#)

Fungal disease: Continue monitoring for brown patch and large patch fungal diseases until May. Proper cultural practices are key in control. **See:** [Brown Patch](#)

Houseplants: : Inspect regularly for pests on indoor plants. Keep in mind that plant specific temperature, light, and humidity are key to ensuring that indoor plants thrive. **See:** [Managing Pests of Indoor Plantscapes](#)

Soil Test: If plants did not perform as desired this year or new plantings are being planned, a soil test will reveal the specific nutrients that need to be applied. **See:** [Soil Testing](#)

Compost: Composting is environmentally friendly and produces a beneficial soil amendment or mulch. Fallen leaves provide the carbon ingredient needed for successful composting. **See:** [Compost Tips for the Home Gardener](#)

Pests: While cooler weather generally means fewer pests, some populations actually increase at this time of year. Continue monitoring and treat as needed. **See:** [Landscape Integrated Pest Management](#)

[Insect Management in the Home Garden](#)

What to Do Every Month

- Adjust irrigation based on rainfall.
- Deadhead flowers to encourage new blooms.
- Monitor the garden for insects and disease.
- Plant trees, shrubs, and perennials and water until established.
- [Mow lawns](#) at recommended heights:
 - St. Augustine & Bahia: 3-4"
 - Centipede: 1.5-2.0"
 - Dwarf St. Augustine: 2.5"
 - [Zoysiagrass](#)
